Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering
Meerut Institute of Engineering and Technology

Current Semester: 7th
CGPA: 7.4

Experience

Decode Labs — Artificial Intelligence Intern

June 2026 – Present (Remote)

- Developing AI-powered applications using Python, Machine Learning, Computer Vision, and Generative AI technologies.
- Building end-to-end solutions involving model integration, backend workflows, APIs, and user-facing interfaces.

Vizolane Technologies LLP — IoT Developer Intern

August 2025 – November 2025

- Developed embedded IoT solutions using ESP32-CAM, Arduino, and Raspberry Pi platforms.
- Implemented hardware-software integration using UART, SPI, and I2C communication protocols.

Technical Skills

Languages	: Python, Java, C
Backend Development	: Flask, REST APIs, Streamlit, PySide6
Database	: PostgreSQL, SQL
Machine Learning	: TensorFlow, OpenCV, MediaPipe, YOLOv8, FaceNet, InsightFace
Generative AI	: Google GenAI (Gemini), LangChain, Ollama
Embedded Systems	: ESP32-CAM, Raspberry Pi, Arduino Uno/Nano
Tools	: Git, GitHub, VS Code, Vercel

Projects

Vizolane ERP (Multi-Tenant School Management System)

Python, Flask, PostgreSQL

- Engineered a multi-tenant ERP platform supporting multiple schools through logical tenant isolation.
- Implemented authentication, role-based access control, and PostgreSQL-backed data models for administrators, teachers, and students.

Natural Language Command Prompt (ChatCMD)

Python, Google GenAI, PySide6

- Developed an AI-powered desktop assistant that converts natural language instructions into executable system commands using Google Gemini.
- Designed a PySide6 interface with execution approval workflows, persistent PowerShell sessions, and multi-threaded command execution.

AI-Based Smart Traffic Management System

Python, YOLOv8, OpenCV

- Developed a traffic monitoring system capable of vehicle detection and adaptive traffic signal optimization using computer vision.
- Designed real-time analytics workflows for traffic density estimation and emergency vehicle prioritization.

Achievements

- Won **ASI One Special Track** at **DevGathering 2K26 Hackathon** for ARIP (Autonomous AI Resource Intelligence Platform).
- Exhibited an AI-powered Smart Traffic Management System at **AI Impact India Summit 2025**.
- Secured **2nd Runner-Up** position in the **Trikon Hackathon**.
